

## **P-05-1120 The Welsh Government should immediately stop all lockdowns**

This petition was submitted by Adrian Mark Phillips having collected a total of 56 signatures.

### **Text of Petition:**

The death rate from Covid19 is relatively low and it makes no sense to exert unnecessary control over the Welsh population and to damage businesses and livelihoods.

### **Additional Information:**

There is no justification for such draconian measures when only a small amount of people die from covid19. We demand the Welsh Government immediately stop all lockdowns and re-open up businesses and allow the general public to make their own decisions on how they choose to live.
